PRODUCT DETAILS

- Calibration and certification software directly engineered to work with Torq-Tronics 2 and System 8
- Backward compatible so it also works with Torq-Tronics, System 4/5, and System 6
- Fulfills your TS 16949 and ISO 17025 requirements
- Gives you a robust database about your torque tools and it also allows you to print Calibration Certificates
- Tracks "As Found" and "As Left" test results
- Tracks "As Found" and "As Left" test results
- NIST traceability numbers and all other data requirements for ISO and QS compliance are covered
- Error-proofs calibration procedures and virtually eliminates retesting due to operator error
- Downloads the proper test protocol to your SR tester and sets up the tester for the tool
- Only accepts results that are in line with the test protocol. Errors resulting from failure to follow the programmed test procedure are automatically rejected
